D1.1 Use cases description at system level and capture of their requirements

Deliverable No.	D1.1	Due Date	28-*Feb*-2021
Type	Report	Dissemination Level	*Confidential*
Version	1.0	Status	Final
Description	Description and requirements of all ANDANTE use cases.		
Work Package	WP1 – Use case system architectures description and application Requirements		

Abstract (Published Summary)

This document provides a system level description of all ANDANTE use cases. It also describes the requirements for each use case. These requirements are taken into account as input for all other work packages within the ANDANTE project, either for the definition of the requirements of the building blocks and ASIC components or for the implementation of the use-cases.
